Q.Factorial

Making sense of sustainability - standards, schemes and strategies

Our consultants know the pros and cons of the many sustainability schemes and standards. They'll ensure your strategy is relevant for your business and genuinely positive for the environment.

At QFactorial we don't just do ISO standards, although we might recommend them as part of your solution. But we start by evaluating which of the many sustainability schemes and standards could be right for you, and how they might come together in a joined-up strategy.

- Materiality assessment
- Goals, targets & priorities
- Standard/ scheme selection
- Strategic plan
- Data gathering & analysis
- Reporting to stakeholders

COLLABORATE, INTEGRATE, CHALLENGE, IMPROVE!

It's a simple journey when you know what you're doing and you've been there many times before.

Where Quality meets Science, Technology & Sustainability

Confused by the number of schemes and standards out there?

Q. Factorial

We have worked with a wide range of sustainability schemes and standards, helping our clients to understand stakeholder demands and expectations and resolve these into a coherent sustainability strategy. We're not interested in box-ticking, badge-collecting or greenwashing. We're interested in providing a foundation and framework for you to become more sustainable.

We are ourselves certified to ISO 9001, so we know what we are talking about!

bsi ISO 9001 Quality Management Systems CERTIFIED

FS 782414

Standard	Who/What's it for?
ISO 14001	environmental management systems
ISO 14064	greenhouse gas emissions
ISO 50001	energy management systems
ISO 26000	social responsibility
PAS 2050	carbon footprinting
PAS 2060	carbon neutrality
EcoVadis	sustainability assessment & rating
B-Corp	social & environmental performance

Don't see your bugbear on this list? Please ask!

Please see our other flyers on ISO Certification and UKAS Accreditation for more standards specifically associated with these services.

If you are already certified to ISO 14001 and/or ISO 50001, we can re-use these as foundations and tools within your broader sustainability strategy. Nothing goes to waste!
